RECEIVED

It seem that in this day of high unemployment, and low to nonexistent inflation, a rate increase of 32.79 pot 46.72% is unreasonable. While prices for electricity have gone up and the company should be allowed to garner additional revenue to cover those expenses the additional cost the company is requesting appear to be excessive.

It would seem that the company that purchased the three water companies is looking to have the users of the service pay for consolidation and upgrades that should have been part of their business plan when they purchased the companies. No business except for regulated utilities could buy up different businesses and then raise the price of the goods

or services to cover expansion of their operations. Any company that did that would just go out of business, when competitors didn't have to raise prices to cover the additional costs.

While a modest rate increase appears to be in order I feel that the amounts being asked for are unreasonable and I request that the commission not approve the increases as requested.
